

# Malik Muhammad Raza

iOS Developer

+92 342 0368659 iosdev318@gmail.com malikraza.vercel.app Lahore, Pakistan

## SUMMARY

iOS Mobile Application Developer with 5+ years of professional experience designing, building, and deploying high-performance native apps with Swift, SwiftUI, and UIKit. Skilled in scalable mobile architecture (MVVM) and clean architecture, REST API integration, Firebase, and performance optimization for fast, reliable user experiences. Experienced in end-to-end App Store deployment and delivering intuitive interfaces aligned with Apple Human Interface Guidelines. A collaborative team player and strong problem solver committed to writing clean, maintainable code that improves retention and product quality.

## EXPERIENCE

### Aivernox

iOS Developer

Feb 2023 – Present

Lahore, Pakistan

- Designed and shipped 15+ high-performance iOS applications using Swift and SwiftUI with MVVM and clean architecture, sustaining a 4.5+ star App Store rating.
- Integrated on-device AI models to deliver predictive features, increasing user engagement by 25% and average session length by 15%.
- Streamlined Firebase and REST API integrations with URLSession and async/await, cutting data-sync latency by 40% and enabling real-time updates across 4+ apps.
- Engineered Swift Data, Core Data, and SQL storage that enabled full offline functionality and reduced redundant network calls by 30%.

### XD Studio

iOS Developer

Nov 2021 – Jan 2023

Lahore, Pakistan

- Built 30+ native iOS applications using SwiftUI and UIKit with robust REST API integration and SQL-backed data management.
- Architected 15+ reusable UI components with Auto Layout, reducing new-screen development time by 20% and improving usability.
- Optimized API integration workflows, improving app connectivity and reducing network errors by 25%.
- Delivered 10+ key features across release cycles, meeting 95% of sprint deadlines for timely, reliable releases.
- Introduced unit and automated UI testing, raising code coverage to 70% and reducing post-release crashes by 35%.

## PROJECTS

### Respire LYF | Swift, SwiftUI, WatchOS, Firebase, Core Data, Combine, URLSession

- Contributed to a digital health platform for asthma and COPD management, tracking breathing score, cough, peak flow, and lifestyle factors such as inhaler use, medication, hydration, sleep, and activity across 10+ tracked metrics.
- Engineered on-device AI cough detection and automatic inhaler tracking via Apple Watch motion sensing, achieving 90%+ detection accuracy with medication reminders, monthly health insights, Apple Health sync, and doctor-ready reports.

---

### **Food App** | *Swift, SwiftUI, UIKit, Vision, AVFoundation, StoreKit, Core Data*

- Built a camera-first nutrition companion with AI plate scanning that estimates ingredients and calories from meal photos using the Vision framework, cutting manual logging time by 60%.
- Implemented a StoreKit subscription paywall with restore, scan history with macro breakdowns, and a calorie and water dashboard, backed by URLSession networking and Core Data persistence, lifting subscription conversion by 20%.

---

### **Ghadana** | *Swift, SwiftUI, UIKit, Combine, URLSession, Codable, Core Data, Keychain*

- Developed a native iOS food and meal-planning app featuring secure authentication and guest checkout with Keychain, personalized recommendations, and a calorie-aware weekly menu builder.
- Integrated REST APIs with Codable models and local caching for smooth scrolling, reducing load times by 35%, plus subscription My Plan flows with renewals and push-friendly reminders.

---

### **Voice Recorder** | *Swift, SwiftUI, UIKit, AVFoundation, Speech, Combine*

- Delivered an audio app with HD recording, live waveform visualization, and trim/edit tools using AVFoundation pipelines, supporting 3+ export formats.
- Added one-tap speech-to-text transcription with the Speech framework at 95% accuracy, a searchable recordings library, and clip-to-video sharing workflows.

---

### **Phone Cleaner** | *Swift, SwiftUI, UIKit, AVFoundation, Combine*

- Created an iOS storage utility that surfaces usage breakdowns, removes duplicate photos, compresses videos, and merges duplicate contacts with preview and confirmation, reclaiming up to 5 GB per scan.
- Designed accessible, high-contrast before/after views that clearly communicate reclaimed storage to users.

---

### **Universal TV Remote** | *Swift, SwiftUI, UIKit, Combine, StoreKit*

- Launched a universal smart-TV remote with touchpad navigation, one-tap channel and app switching, photo and video casting, and voice control over Wi-Fi, supporting 5+ TV brands.

---

### **Pixify Photo** | *Swift, UIKit*

- Shipped an advanced photo-sharing app similar to Snapchat, delivering enhanced sharing features built with UIKit.

## **SKILLS**

---

**Languages & Frameworks:** Swift, SwiftUI, UIKit, Objective-C, Combine, Core Data, MVVM, Auto Layout, Concurrency (Async/Await), SQL

**iOS & Mobile:** Xcode, Apple iOS, WatchOS, REST APIs, JSON, Networking, Firebase, Push Notifications, Authentication, Performance Optimization, Memory Management, Apple Human Interface Guidelines

**Tools & Testing:** Git, GitHub, CocoaPods, SPM, App Store, Unit Testing, Automated Testing, Vercel, macOS

## EDUCATION

---

**Superior University Lahore**

*Bachelor of Science in Computer Science (BSCS)*

Jan 2019 – Jan 2023

*Lahore, Pakistan*
